

Babak Nouri-Moghaddam received the B.Sc. degree from the Tabriz University, Iran, in 2010, and the M.Sc. degree from the Kerman Graduate University of Advanced Technology, Iran, in 2012, both in information technology engineering. He is currently pursuing the Ph.D. degree in Iran University of Science and Technology. His current research interests include

machine learning, feature selection, and big data.

Mehdi Ghazanfari is a Professor of Industrial Engineering at Iran University of Science and Technology (IUST). He received his Ph.D. from the University of New South Wales (UNSW) in 1996 and initiated his work as a faculty member at SIE since 1992. His research vision is concentrated mainly on Artificial Intelligence and its applications, Data Mining, Fuzzy Set Theory and its Applications, and Social Networks Analysis in Industrial

Engineering. He has more than 100 research papers and seven books in the areas of Data Mining, Fuzzy Set Theory, and Industrial Engineering.

Mohammad Fathian. Mohammad Fathian is a Professor of Industrial Engineering at Iran University of Science and Technology. He received his Ph.D. from Iran University of Science and Technology in 2002 and initiated his work as a faculty member at SIE since 2004. His research vision is concentrated mainly on Information Technology and its applications, especially e-business and

e-commerce. He teaches Concepts and models of Electronic commerce, Electronic Commerce Security, Management information systems in technology management and Fundamentals of information technology courses. He has more than 60 research papers and five books in the areas of information technology.
